TOXICOLOGY

www.elsevier.com/locate/toxicol

Subject index of volume 196

2-Acetylaminofluorene; Liver regeneration, Histology, Lipid peroxidation, Periportal damage, Pericentral damage **196**, 155

2-Amino-1-methyl-6-phenylimidazo-[4,5-*b*]pyridine (PhIP); Aflatoxin B_1 (AFB_1), Dibenzo(*a,l*)pyrene (DBP), Polycyclic aromatic hydrocarbon (PAH), Chlorophyllin (CHL), Caco-2 cells **196**, 117

Aflatoxin B_1 (AFB_1); Dibenzo(*a,l*)pyrene (DBP), Polycyclic aromatic hydrocarbon (PAH), 2-Amino-1-methyl-6-phenylimidazo-[4,5-*b*]pyridine (PhIP), Chlorophyllin (CHL), Caco-2 cells **196**, 117

Alkaline phosphatase; Phytoestrogen, Environmental estrogens, MC3T3-E1, Mineralization, Differentiation **196**, 137

Ammonium perfluorooctanoate (APFO); Perfluorooctanoate (PFOA), Reproduction, Multi-generation **196**, 95

Antigen-presenting activity; Ozone, Lung, Antigen-presenting cells, Ia antigen, Costimulatory molecules **196**, 217

Antigen-presenting cells; Ozone, Lung, Antigen-presenting activity, Ia antigen, Costimulatory molecules **196**, 217

Apoptosis; Lindane, Malathion, Permethrin, Chemical mixtures, Immunotoxicity **196**, 181

Atropine sulfate; DFP, CPA, MK801, Diazepam, 2PAM, Rats, Histopathology **196**, 31

Autoimmunity; Hepatitis B vaccine, (NZB × NZW) F_1 mice, Risk factors **196**, 211

Autoimmunity; Mercuric chloride, Mice, T-cells, Cyclosporin, Tacrolimus **196**, 197

Brain; Toluene, Low dose, Tyrosine hydroxylase, Tryptophane hydroxylase **196**, 21

2-Bromopropane; Maternal toxicity, Embryotoxicity, Teratogenicity, Rats **196**, 77

Caco-2 cells; Aflatoxin B_1 (AFB_1), Dibenzo(*a,l*)pyrene (DBP), Polycyclic aromatic hydrocarbon (PAH), 2-Amino-1-methyl-6-phenylimidazo-[4,5-*b*]pyridine (PhIP), Chlorophyllin (CHL) **196**, 117

Chemical mixtures; Lindane, Malathion, Permethrin, Apoptosis, Immunotoxicity **196**, 181

Chlorophyllin (CHL); Aflatoxin B_1 (AFB_1), Dibenzo(*a,l*)-pyrene (DBP), Polycyclic aromatic hydrocarbon (PAH), 2-Amino-1-methyl-6-phenylimidazo-[4,5-*b*]pyridine (PhIP), Caco-2 cells **196**, 117

Copper; Trout, Hepatocytes, Reactive oxygen species, Intracellular Calcium **196**, 57

Costimulatory molecules; Ozone, Lung, Antigen-presenting cells, Antigen-presenting activity, Ia antigen **196**, 217

CPA; DFP, Atropine sulfate, MK801, Diazepam, 2PAM, Rats, Histopathology **196**, 31

Cyclosporin; Mercuric chloride, Mice, Autoimmunity, T-cells, Tacrolimus **196**, 197

Cytochrome *c*; Propolis ethanol extract, Malonic dialdehyde, Econazole **196**, 87

Cytotoxicity; Pharmaceuticals, PLHC-1, Primary rainbow trout hepatocytes, EROD, Oxidative stress **196**, 41

DFP; Atropine sulfate, CPA, MK801, Diazepam, 2PAM, Rats, Histopathology **196**, 31

Diazepam; DFP, Atropine sulfate, CPA, MK801, 2PAM, Rats, Histopathology **196**, 31

doi:10.1016/S0300-483X(04)00070-8

Diazinon; Humoral and cellular immunosuppression, Immunotoxicity **196**, 173

Dibenzo(*a,l*)pyrene (DBP); Aflatoxin B_1 (AFB_1), Polycyclic aromatic hydrocarbon (PAH), 2-Amino-1-methyl-6-phenylimidazo-[4,5-*b*]pyridine (PhIP), Chlorophyllin (CHL), Caco-2 cells **196**, 117

Dichloroacetic acid; DNA hypomethylation, Insulin-like growth factor-II gene, Mouse liver tumors, mRNA expression, Trichloroacetic acid **196**, 127

Differentiation; Phytoestrogen, Environmental estrogens, Alkaline phosphatase, MC3T3-E1, Mineralization **196**, 137

DNA adducts; Human skin, Rat skin, Percutaneous penetration, Methylenedianiline, ^{32}P-postlabeling **196**, 65

DNA hypomethylation; Dichloroacetic acid, Insulin-like growth factor-II gene, Mouse liver tumors, mRNA expression, Trichloroacetic acid **196**, 127

Econazole; Propolis ethanol extract, Malonic dialdehyde, Cytochrome *c* **196**, 87

Embryotoxicity; 2-Bromopropane, Maternal toxicity, Teratogenicity, Rats **196**, 77

Environmental estrogens; Phytoestrogen, Alkaline phosphatase, MC3T3-E1, Mineralization, Differentiation **196**, 137

EROD; Pharmaceuticals, PLHC-1, Primary rainbow trout hepatocytes, Cytotoxicity, Oxidative stress **196**, 41

Feeding study; Nonylphenol (NP), In utero exposure, Immunomodulation, Rat **196**, 237

Food allergy; Ovalbumin, Oral, IgE, IgG **196**, 247

Genotoxic carcinogens; Genotoxicity assays, Limits of the standard three-test battery **196**, 1

Genotoxicity assays; Genotoxic carcinogens, Limits of the standard three-test battery **196**, 1

Hepatic disorder; Sesame oil, Lipopolysaccharide, Oxidative stress, Lipid peroxidation, Reactive oxygen intermediates **196**, 147

Hepatitis B vaccine; Autoimmunity, (NZB × NZW) F_1 mice, Risk factors **196**, 211

Hepatocytes; Trout, Copper, Reactive oxygen species, Intracellular Calcium **196**, 57

Histology; Liver regeneration, Lipid peroxidation, 2-Acetylaminofluorene, Periportal damage, Pericentral damage **196**, 155

Histopathology; DFP, Atropine sulfate, CPA, MK801, Diazepam, 2PAM, Rats **196**, 31

Human skin; Rat skin, Percutaneous penetration, Methylenedianiline, ^{32}P-postlabeling, DNA adducts **196**, 65

Humoral and cellular immunosuppression; Diazinon, Immunotoxicity **196**, 173

Ia antigen; Ozone, Lung, Antigen-presenting cells, Antigen-presenting activity, Costimulatory molecules **196**, 217

IgE; Food allergy, Ovalbumin, Oral, IgG **196**, 247

IgG; Food allergy, Ovalbumin, Oral, IgE **196**, 247

Immunomodulation; Nonylphenol (NP), In utero exposure, Rat, Feeding study **196**, 237

Immunotoxicity; Humoral and cellular immunosuppression, Diazinon **196**, 173

Immunotoxicity; Lindane, Malathion, Permethrin, Chemical mixtures, Apoptosis **196**, 181

Immunotoxicity; Piperine (I-piperoyl peperdine), Oral, Mice **196**, 229

In utero exposure; Nonylphenol (NP), Immunomodulation, Rat, Feeding study **196**, 237

Insulin-like growth factor-II gene; Dichloroacetic acid, DNA hypomethylation, Mouse liver tumors, mRNA expression, Trichloroacetic acid **196**, 127

Intracellular Calcium; Trout, Hepatocytes, Copper, Reactive oxygen species **196**, 57

Limits of the standard three-test battery; Genotoxic carcinogens, Genotoxicity assays **196**, 1

Lindane; Malathion, Permethrin, Chemical mixtures, Apoptosis, Immunotoxicity **196**, 181

Lipid peroxidation; Liver regeneration, Histology, 2-Acetylaminofluorene, Periportal damage, Pericentral damage **196**, 155

Lipid peroxidation; Sesame oil, Lipopolysaccharide, Oxidative stress, Reactive oxygen intermediates, Hepatic disorder **196**, 147

Lipopolysaccharide; Sesame oil, Oxidative stress, Lipid peroxidation, Reactive oxygen intermediates, Hepatic disorder **196**, 147

Liver regeneration; Histology, Lipid peroxidation, 2-Acetylaminofluorene, Periportal damage, Pericentral damage **196**, 155

Low dose; Toluene, Tyrosine hydroxylase, Tryptophane hydroxylase, Brain **196**, 21

Lung; Ozone, Antigen-presenting cells, Antigen-presenting activity, Ia antigen, Costimulatory molecules **196**, 217

Malathion; Lindane, Permethrin, Chemical mixtures, Apoptosis, Immunotoxicity **196**, 181

Malonic dialdehyde; Propolis ethanol extract, Cytochrome *c*, Econazole **196**, 87

Maternal toxicity; 2-Bromopropane, Embryotoxicity, Teratogenicity, Rats **196**, 77

MC3T3-E1; Phytoestrogen, Environmental estrogens, Alkaline phosphatase, Mineralization, Differentiation **196**, 137

Mercuric chloride; Mice, Autoimmunity, T-cells, Cyclosporin, Tacrolimus **196**, 197

Methylenedianiline; Human skin, Rat skin, Percutaneous penetration, ^{32}P-postlabeling, DNA adducts **196**, 65

Mice; Mercuric chloride, Autoimmunity, T-cells, Cyclosporin, Tacrolimus **196**, 197

Mice; Piperine (I-piperoyl peperdine), Oral, Immunotoxicity **196**, 229

Mineralization; Phytoestrogen, Environmental estrogens, Alkaline phosphatase, MC3T3-E1, Differentiation **196**, 137

MK801; DFP, Atropine sulfate, CPA, Diazepam, 2PAM, Rats, Histopathology **196**, 31

Mouse liver tumors; Dichloroacetic acid, DNA hypomethylation, Insulin-like growth factor-II gene, mRNA expression, Trichloroacetic acid **196**, 127

mRNA expression; Dichloroacetic acid, DNA hypomethylation, Insulin-like growth factor-II gene, Mouse liver tumors, Trichloroacetic acid **196**, 127

Multi-generation; Ammonium perfluorooctanoate (APFO), Perfluorooctanoate (PFOA), Reproduction **196**, 95

(NZB × NZW) F_1 mice; Hepatitis B vaccine, Autoimmunity, Risk factors **196**, 211

Nonylphenol (NP); In utero exposure, Immunomodulation, Rat, Feeding study **196**, 237

Oral; Food allergy, Ovalbumin, IgE, IgG **196**, 247

Oral; Piperine (I-piperoyl peperdine), Immunotoxicity, Mice **196**, 229

Ovalbumin; Food allergy, Oral, IgE, IgG **196**, 247

Oxidative stress; Pharmaceuticals, PLHC-1, Primary rainbow trout hepatocytes, Cytotoxicity, EROD **196**, 41

Oxidative stress; Sesame oil, Lipopolysaccharide, Lipid peroxidation, Reactive oxygen intermediates, Hepatic disorder **196**, 147

Ozone; Lung, Antigen-presenting cells, Antigen-presenting activity, Ia antigen, Costimulatory molecules **196**, 217

2PAM; DFP, Atropine sulfate, CPA, MK801, Diazepam, Rats, Histopathology **196**, 31

Percutaneous penetration; Human skin, Rat skin, Methylenedianiline, ^{32}P-postlabeling, DNA adducts **196**, 65

Perfluorooctanoate (PFOA); Ammonium perfluorooctanoate (APFO), Reproduction, Multi-generation **196**, 95

Pericentral damage; Liver regeneration, Histology, Lipid peroxidation, 2-Acetylaminofluorene, Periportal damage **196**, 155

Periportal damage; Liver regeneration, Histology, Lipid peroxidation, 2-Acetylaminofluorene, Pericentral damage **196**, 155

Permethrin; Lindane, Malathion, Chemical mixtures, Apoptosis, Immunotoxicity **196**, 181

Pharmaceuticals; PLHC-1, Primary rainbow trout hepatocytes, Cytotoxicity, EROD, Oxidative stress **196**, 41

Phytoestrogen; Environmental estrogens, Alkaline phosphatase, MC3T3-E1, Mineralization, Differentiation **196**, 137

Piperine (I-piperoyl peperdine); Oral, Immunotoxicity, Mice **196**, 229

PLHC-1; Pharmaceuticals, Primary rainbow trout hepatocytes, Cytotoxicity, EROD, Oxidative stress **196**, 41

Polycyclic aromatic hydrocarbon (PAH); Aflatoxin B_1 (AFB_1), Dibenzo(*a,l*)pyrene (DBP), 2-Amino-1-methyl-6-phenylimidazo-[4,5-*b*]pyridine (PhIP), Chlorophyllin (CHL), Caco-2 cells **196**, 117

^{32}P-postlabeling; Human skin, Rat skin, Percutaneous penetration, Methylenedianiline, DNA adducts **196**, 65

Primary rainbow trout hepatocytes; Pharmaceuticals, PLHC-1, Cytotoxicity, EROD, Oxidative stress **196**, 41

Propolis ethanol extract; Malonic dialdehyde, Cytochrome *c*, Econazole **196**, 87

Rat skin; Human skin, Percutaneous penetration, Methylenedianiline, ^{32}P-postlabeling, DNA adducts **196**, 65

Rat; Nonylphenol (NP), In utero exposure, Immunomodulation, Feeding study **196**, 237

Rats; 2-Bromopropane, Maternal toxicity, Embryotoxicity, Teratogenicity **196**, 77

Rats; DFP, Atropine sulfate, CPA, MK801, Diazepam, 2PAM, Histopathology **196**, 31

Reactive oxygen intermediates; Sesame oil, Lipopolysaccharide, Oxidative stress, Lipid peroxidation, Hepatic disorder **196**, 147

Reactive oxygen species; Trout, Hepatocytes, Copper, Intracellular Calcium **196**, 57

Reproduction; Ammonium perfluorooctanoate (APFO), Perfluorooctanoate (PFOA), Multi-generation **196**, 95

Risk factors; Hepatitis B vaccine, Autoimmunity, (NZB × NZW) F_1 mice **196**, 211

Sesame oil; Lipopolysaccharide, Oxidative stress, Lipid peroxidation, Reactive oxygen intermediates, Hepatic disorder **196**, 147

T-cells; Mercuric chloride, Mice, Autoimmunity, Cyclosporin, Tacrolimus **196**, 197

Tacrolimus; Mercuric chloride, Mice, Autoimmunity, T-cells, Cyclosporin **196**, 197

Teratogenicity; 2-Bromopropane, Maternal toxicity, Embryotoxicity, Rats **196**, 77

Toluene; Low dose, Tyrosine hydroxylase, Tryptophane hydroxylase, Brain **196**, 21

Trichloroacetic acid; Dichloroacetic acid, DNA hypomethylation, Insulin-like growth factor-II gene, Mouse liver tumors, mRNA expression **196**, 127

Trout; Hepatocytes, Copper, Reactive oxygen species, Intracellular Calcium **196**, 57

Tryptophane hydroxylase; Toluene, Low dose, Tyrosine hydroxylase, Brain **196**, 21

Tyrosine hydroxylase; Toluene, Low dose, Tryptophane hydroxylase, Brain **196**, 21
